- **How do I Launch the Poker Software to Play on it?**

PokerPages & PokerSchoolOnline Players: To launch the Poker software, double click on the icon that says 'PokerPages Software' on your desktop. Or, click on 'PokerPages Software' in your Start/Programs menu.

BugsysClub Players: To launch the Poker software, double click on the icon that says 'BugsysClub Software' on your desktop. Or, click on 'PokerPages Software' in your Start/Programs menu.

If you cannot find the icon on your desktop or the 'PokerPages Software' in your Start/Programs menu, then look for the installer executable file on your desktop (called PPSsetup.exe for PokerPages & PokerSchoolOnline, or BugsysClubSetup.exe for BugsysClub).

- **How to find out my PC's configuration**

Use your mouse button to right click on the 'My Computer' icon on your desktop. This opens a menu. Scroll down and click on 'Properties' at the bottom of the menu. A new screen opens. The Operating System will be reported towards the top of this new screen. The RAM and Processor speed is reported towards the bottom of this new screen.

You can also discover your computer's processor speed by turning off your machine and then starting it up again. While the machine "boots up" you will see multiple lines of DOS code flashing briefly over a black background. Often, you will see "processor speed" appear for a few seconds, with a value in MHz.

- I've downloaded the installer file: PPSsetup.exe/BugsysClub.exe but now I can't find it.

If you are having a problem finding the installer file you downloaded, go to your start menu at the bottom left of your screen. Click 'Start', then look for 'Search or 'Find' Command. Select to look for 'Files or Folders...'.

A new window will open. In this window, type on the 'name of file' line either PPSsetup.exe if you are a PokerSchoolOnline or PokerPages player OR BugsysClub.exe if you are a BugsysClub player. If you have the option, make sure that the 'Look in' line is set for 'My Computer' and the 'Include Subfolders' box near the bottom is checked.

Now click the find or search button and wait for the computer to find the installer file. Once the file has been found in the list of found files, double click on it to launch it and install the software.

-
- After I double click on the PPSsetup.exe/BugsysClub.exe nothing happens. What should I do?

You may already have installed the Poker Software. If so, you are ready to play! Check in either of these 2 places to see whether you have already installed the Poker Software:

1. Look for the (PokerPages/PokerSchoolOnline) or (BugsysClub) icon on your desktop.
2. Look on your Start/Program menu to see if 'PokerPages Software' is listed.

If you didn't find either of the above, then you need to download the software installer executable again. Just click on the one you need immediately below. If it asks you if you want to overwrite the old one, answer 'yes'.

- I don't get anything after I've clicked to download the Software Installer executable.

Please be sure to wait at least 3 minutes for the installer

download screen to come up- it's sometimes slow to appear, especially if you are running other applications. If after 3 minutes the download screen does not appear, please email support:

If Bugsy's Club: email Support@BugsysClub.com

If PokerPages: email support@pokerpages.com

If PokerSchoolOnline: email support@pokerschoolonline.com

• **What do I do once I've downloaded the Poker Software Executable?**

You're nearly there. Double click on the Software Executable icon sitting on your desktop. It installs the Poker software on your PC for you to play on. It also places an 'Ace of Spades' icon (PokerPages/PokerSchoolOnline) or 'Man with Hat' icon (Bugsy's Club) on your desktop for fast access to the Poker software. It will also place 'PokerPages Software' on your Start/Program menu.

To launch the software just double click on the 'Ace of Spades' icon (PokerPages/PokerSchoolOnline) or 'Man with Hat' icon (Bugsy's Club) on your desktop.
